Take Home Mould Kit

The take home mould kit is an inexpensive way to collect a mould sample in your home. The kit contains everything you need to collect a proper mould sample. Just set up the stand, attach the cassette at the end of the tube and run the pump for 5 minutes. Bring the sample back to us and we will email the result to you.

The cost of the Take Home Mould Kit is \$100.00 plus the GST. This price includes the rental of the kit, the cassette and the cost of analysing the first sample. Additional samples can be added for \$60.00 plus the GST.
